

Stunning photorealism made simple.
The complete, artist-friendly
workflow for archviz.

For Autodesk 3ds Max & Cinema 4D

Benefits

Easy to use

Learn Corona renderer in a day, fall in love with it in two.

Unmatched photorealism

High-end, physically accurate renders and animations out of the box.

Faster scene creation

22,000+ high-quality assets, lifelike crowd & traffic simulation, & more.

AI at your service

Validate concepts before you commit. Enhance finals with control.

Real-time exploration

Iterate faster with direct, real-time previews in Chaos Vantage.

One connected workflow

Benefit from seamless integration with Cosmos, Cloud Collaboration, Vantage, Anima, & Veras AI.

★★★★★ 4.7/5

Chaos Ecosystem

One workflow, designed for the way ArchViz works today.

Blending human creativity with AI power for exceptional visual storytelling.

Ideate with AI

Instantly test concepts, create moodboards and variations with Veras AI before you commit to a full scene build.

Scene Assembly

Build your scene easily with render-ready assets, customizable scanned materials, smart scattering, and more.

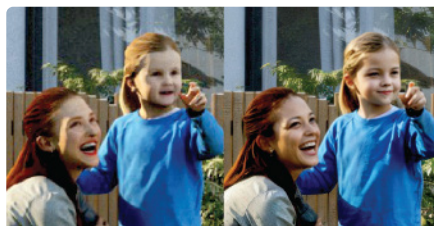

Camera & Lighting

Define the atmosphere with physically accurate lighting. Explore ray-traced scenes in real-time with the Corona to Chaos Vantage Live Link.

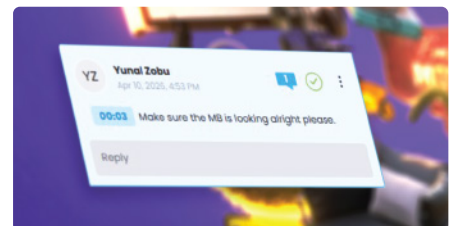

Enrich & Animate

Make your scene feel truly alive with cinematic movement, scale, & human presence. Add believable, animated crowds & smart traffic with Chaos Anima.

Render & Refine

Render final images & animations with the natural realism. Adjust lighting & color without re-rendering. Refine people, vegetation, & terrain with AI.

Collaborate & Present

Keep projects moving with seamless collaboration, faster feedback on stills, videos and 3D streaming, & client-ready presentations in Chaos Cloud.

Nikos Nikolopoulos

Founder/Creative Director, Creative Lighting

My continuous pursuit of excellence and innovation led me to Chaos Corona, a tool that has revolutionized our workflow and redefined our creative expression.

Key Features

Rendering

Fast, photoreal CPU and GPU rendering with minimal setup.

CPU rendering Denoising Caustics Resumable rendering
GPU rendering with Vantage Live Link Gaussian splats

Lighting & Illumination

Create natural lighting and adjust it even after rendering.

Global Illumination Procedural Sun & Sky Night Sky LightMix
Adaptive light sampling Firefly removal

Cameras & Effects

Photographic controls and cinematic effects for compelling visuals.

Photoreal camera Motion Blur Bloom & Glare Lens effects
VR Fisheye Panoramic Per-camera resolution

Atmospheric & Volumetric effects

Enhance realism with atmospheric depth and lighting effects - with full artistic control.

Volume rendering Aerial Perspective Crepuscular rays
Fog and Mist

AI-powered creation

Accelerate ideation, enhancement, and final polish. Win back time with AI tools built into your workflow.

AI Enhancer AI Upscaler AI Material Generator
Veras AI ideation Veras Image to video

Render Elements

Fine-tune every image with flexible compositing controls.

Render Elements Multipasses Cryptomatte Normals
Depth Direct Indirect Composition guides

Geometry

Create rich, detailed environments with ease. Works with any native geometry.

Proxy geometry Corona Slicer for render-time booleans
Hair and Fur Chaos Scatter Patterns

Collaboration

An easy, structured review and approval process for your team and clients.

Image Reviews Video Collaboration Annotations
Real-time 3D Streaming Walkthroughs Virtual Tours

Materials, Textures & Assets

Physically based materials and flexible texturing tools for realistic surfaces. Massive asset library for fast scene assembly.

Physical Material Scanned materials Chaos Cosmos library Procedural Fabrics Displacement Triplanar Mapping
Animated crowds and traffic UVW Randomizer

Trusted by thousands of 3D artists, architects & designers worldwide.
